**UF/IFAS** is the foundation for the land-grant mission in Florida—to develop knowledge in agricultural, human and natural resources, and to make this knowledge accessible to enhance the quality of life.

*Flavors of Florida is a showcase of the flavors, foliage, fragrances, fibers, fuels, and more Florida has to offer.* Participants are surrounded by ornamental varieties and native plants as they taste chef-created dishes and original beverages featuring both classic and emerging Florida crops. Some are the newest varieties not yet available to the public. Join us as we celebrate the partnerships that make our success possible and connect with those who share our passions.

With partnerships across the state and world, UF/IFAS is tackling challenges to feed a growing world population, protect our environment, and grow the next generation of scientists, agriculturalists, teachers and leaders.
